

AMENDMENTS

In the Specification

Please replace paragraph 0002 of the specification with the following paragraph:

- - Users of computing devices, such as desktop PCs, set-top boxes, personal digital assistants (PDAs), and so on, have access to an ever increasing amount of multimedia content (e.g., audio, video, and other assorted data). Typically, this multimedia content is accessed, manipulated and/or presented on a computing device using a multimedia application running on the device device. - -
